August 1986

UNITED STATES RICE EXPORTS OVER THE PAST 10 YEARS

Exports of U.S. rice increased rapidly during the 1970's, peaked in 1981 at about 3 million tons, and declined steadily to less than 2 million tons by 1985. As the export quantities varied over the period, so did the major export destinations. The three major export markets for U.S. rice in 1976, Indonesia, Iran, and the Republic of Korea, imported almost no U.S. rice by 1985. Nigeria, which was a major market during most of the 10-year period, (1976-85) imported very little U.S. rice by the end of the period. The largest importer of U.S. rice in 1985 was Iraq, followed by Saudi Arabia, Senegal, and the Philippines.

Regional export distribution also changed markedly over the 10-year period. Asian countries accounted for over 37 percent of U.S. exports in 1976, but only 11 percent by 1985. African destinations accounted for less than 12 percent of exports in 1976, but over 28 percent by 1985. The share of exports to the Middle East also increased, from 23 percent in 1976 to 33 percent in 1985. The share of exports to Western Europe changed only slightly, from 18 percent in 1976 to 15 percent in 1985.

The composition of U.S. rice exports also has changed somewhat during the 10-year period. Brown rice comprised almost 27 percent of exports in 1976, grew to over 33 percent in 1981, then dropped to only 15 percent in 1985 as exports to Asian destinations declined. Exports of parboiled rice increased both in quantity and as a percentage. It accounted for only 21 percent of rice exports in 1976, peaked at 41 percent in 1982, and fell back to 27 percent in 1985. The percentage of white rice exports decreased slightly from 52 percent in 1976 to 46 percent in 1985.

Rice exports under the P.L.-480 program (titles I, II, and III) decreased from 916,000 tons in 1976 (45 percent of U.S. rice exports) to 537,000 tons in 1985 (28 percent).

NOTES AND EXPLANATIONS OF THE DATA BASE

1. All tables, exclusive of those on PL-480 shipments are based on U.S. Census statistics. Rice exports are converted to a milled rice equivalent. Brown rice is converted by multiplying by .88 and rough rice by using .72.
2. The export data is not adjusted for transshipments.
3. A dash denotes a nil level of exports, while a "0" indicates that less than 500 kg were exported.
4. Brown parboiled rice is alternately reported as brown rice or parboiled rice.
5. "Other rice" is an aggregation of "rice for relief" plus "rice not for relief".
6. The U.S. Rice marketing year begins August 1 and ends July 31. In the marketing year tables, the column labeled 1976 for example, denotes a year beginning August 1, 1976 and ending July 31, 1977.
7. The U.S. Rice fiscal year begins October 1 and ends September 30. In the fiscal year tables, the column labeled 1976 for example, denotes a year beginning October 1, 1976 and ends September 30, 1977.

World Grain Situation and Outlook

FG 10-86
August 1986

There has been a great deal of controversy recently about expansion of U.S. export promotion programs. It has been argued, for example, that in choosing to confront the European Community's aggressive subsidization of exports, the United States also threatens the traditional markets of other grain exporting countries. This month's cover graphs attempt to put these discussions in focus by showing changes in market share of all exporting countries since 1980/81, the record year of U.S. grain exports.

WORLD GRAIN SITUATION/OUTLOOK

The outlook for world wheat and coarse grain trade improved slightly this month, as lower Soviet crop prospects are expected to mean increased demand for imported grains. The world grain trade forecast of 182 million metric tons is up marginally from last month's forecast and nearly 14 million tons more than 1985/86 trade. Despite the expected recovery in 1986/87, the level of world grain trade will still be approximately 8 percent below the average of the early 1980's. Record world wheat and coarse grain supplies are still expected for 1986/87, as increased estimates of Canadian barley and U.S. corn production more than offset declines in outturn for the Soviet Union and the European Community (EC). Generally lower export prices, plus recently announced U.S. Export Enhancement Programs are increasing the price competitiveness of U.S. grains relative to other suppliers.

Major developments in world grain situation include:

- Sharply lower EC wheat and coarse grain crop prospects because of continued drought.
- A decline in the 1986/87 EC wheat export forecast, as the Community faces increased U.S. competition and larger competitor supplies.
- Record Canadian crop prospects.
- Higher forecast grain imports for the Soviet Union because of lower crop prospects.
- Lower crop and export prospects for Australian barley.
- A drop in forecast Turkey wheat imports because of a record crop.
- Improved prospects for 1986/87 U.S. wheat and coarse grain exports.

WHEAT

World wheat markets this past month were characterized by increasing uncertainty as the United States announced further programs to increase exports, Canadian crop prospects improved, and the Soviet Union was relatively inactive in the world market. The newly announced U.S. Export Enhancement Program (EEP) to the Soviet Union, as well as the already announced programs including initiatives to North Africa are expected to result in increased U.S. wheat exports in 1986/87. On the other hand, EC 1986/87 wheat exports are expected to decline slightly as intensified U.S. competition, lower world prices, and the weaker dollar increase the cost of export subsidies, and lower EC production results in an increase in EC intra-trade.

MAJOR IMPORTING COUNTRIES

World wheat trade for 1986/87 July-June is forecast at 91.7 million tons, virtually unchanged from last month and nearly 7 million tons more than in 1985/86. The demand for imported wheat by the Soviet Union and several North African countries is expected to increase from 1985/86 because of short crops and lower world prices.

The 1986/87 July-June wheat import forecast for the Soviet Union was raised a million tons this month to 19 million tons, reflecting a 5-million-ton decline in the USSR grain crop forecast. Although somewhat higher than last year, this level of imports is still well below the average import level for the early 1980's. The recently announced U.S. Export Enhancement Program allows the Soviet Union to purchase the 4 million tons of wheat agreed to in the US-USSR Long Term Agreement for 1985/86 (October-September) at world market prices. The Soviet Union has until September 30 to purchase the wheat and can take delivery at any time.

A record wheat crop of 14 million tons is forecast for Turkey, nearly a million tons greater than last month's forecast and 1.3 million tons greater than the 1985 harvest. The increase in domestic supplies should mean reduced demand for wheat imports. The 1986/87 July-June import forecast was cut to 600,000, down 400,000 tons from last month.

With the harvest well underway in the EC, the full impact of recent dry, hot weather is now apparent. The French wheat crop is now forecast at 27 million tons, approximately 1.5 million tons less than last month's forecast and 2 million tons less than last year. The smaller EC crop is expected to result in local shortages, particularly in Spain where increased imports of EC wheat will be necessary to meet human consumption and feed demand. Any increase in overall EC demand for soft wheat could be covered by the ample 1986 United Kingdom (UK) crop and large EC carryover stocks.

MAJOR EXPORTING COUNTRIES

Canada, Australia, and Argentina

Despite intense competition from the EC, United States, and several non-traditional wheat exporters, the major competitors are expected to export nearly 39 million tons of wheat in 1986/87, roughly the same volume as in 1985/86. In 1985/86 these exports accounted for a record 45 percent of world wheat trade, 5 percent more than the previous 5 year average. This year, because of the partial recovery in U.S. trade, this volume represents about 42 percent of world wheat trade.

Canadian 1986 crop prospects continue to improve, the forecast is now a record 29.5 million tons, up 2.5 million tons from last month. The estimate of Canadian 1986/87 July-June exports continues to be 19.5 million tons reflecting more competition from other exporting countries. In addition to increased competition in many markets, Canada is faced with lower demand in markets such as Brazil where increased outturn will likely satisfy a greater proportion of domestic demand.

Planting of the 1986 Australian and Argentine wheat crops is virtually complete and in both countries the area is lower than in 1985. In Australia, the reduction is attributed to dry weather and the shift to small grains such as oats. The Australian 1986 wheat crop is forecast at 15 million tons, down marginally from last month's forecast and the lowest level in 3 years. Intense competition, a small 1986 crop, and reduced carry-in stocks following the extremely aggressive 1985/86 marketing program should limit 1986/87 July-June exports to 14.5 million tons. However, even this export level will continue the year-to-year drawdown in Australian ending stocks. At 3 million tons, ending stocks for 1986/87 are at the lowest level since the short crop of 1982.

In Argentina, farmers have responded to poor 1985/86 returns and even lower expected 1986/87 returns by reducing planted wheat area to the lowest level in 5 years. The 1986 Argentine wheat crop forecast is 9.6 million tons, 1986/87 July-June exports are 4.6 million tons; both are unchanged from last month. Exports are at the lowest level in 4 years and 1.5 million tons less than the 1985/86 level.

EUROPEAN COMMUNITY

The EC 1986/87 July-June wheat export forecast was lowered a million tons this month, to 15 million tons. Intense competition from the United States, larger Canadian supplies, and the increasing cost of export subsidies is expected to limit EC exports to just slightly less than the 1985/86 level. A possible EC response to the U.S. export programs and an alternative to direct export subsidies could be the sale of wheat from intervention stocks to targeted markets. This wheat could be released at competitive prices without depleting domestic free stocks and increasing internal EC wheat prices. In addition to the higher cost associated with EC wheat export subsidies, the significant decline in this year's crop is expected to cause some EC wheat trade to be diverted to EC wheat-deficit countries, such as Spain.

U.S Trade Prospects

U.S. 1986/87 July-June wheat exports are forecast at 31.5 million tons, up a million tons from last month's forecast. Although nearly 26 percent higher than in 1985/86, this still represents the second lowest level of exports since 1978/79. Export prospects have improved this month with the strengthening competitiveness of U.S. wheat vis-a-vis other origins on the world market.

The pace of U.S. wheat exports has quickened in response to generally lower export prices and the EEP initiatives as indicated by total commitments of nearly 10 million tons for the first 2 months of the June-May marketing year. These commitments represent nearly a third of forecast 1986/87 wheat exports. Although the response to the EEP programs can be seen in total North African commitments, the price response can also be seen in other markets. For example, several traditional U.S. markets including Taiwan, Indonesia, and Iraq which have not been targeted by EEP, have current commitments well above those for the same period last year. With the exception of 1983/84, the year-to-year decline in U.S. ending stocks for 1986/87 will be the first such decline in nearly a decade.

****COARSE GRAINS****

World coarse grain trade for October-September 1986/87 is forecast at 90.1 million tons, up sharply from 1985/86 and about equal to the coarse grain trade of the early 1980's. However, the composition of coarse grains and exporter market share have changed in the past 5 years with the importance of both corn and the United States declining. In the early 1980's U.S. corn exports represented nearly 55 percent of world coarse grain trade, while in 1986/87 it is expected to equal less than 45 percent. On the other hand, world barley trade has increased from 15 percent in 1982/83 to nearly 18 percent forecast for 1986/87. The importance of the non-traditional exporter has also grown in this time. For example, China's share of world coarse grain trade has increased from less than 1 percent to more than 6 percent over the same time span.

MAJOR IMPORTING COUNTRIES

This month, the forecast for 1986/87 world coarse grain trade remains virtually unchanged as an increase in Soviet import demand more than offset cuts in the forecast imports for Mexico and several other smaller importers. The 1986/87 coarse grain import forecast for Mexico was lowered 800,000 tons to 4.8 million tons as it became apparent that the particularly slow purchase pace of 1985/86 was more a reflection of reduced demand and limited foreign currency, than a deferral of purchases until the 1986 new crop became available. Likewise the 1986/87 import forecasts for Saudi Arabia and Iraq were lowered to align consumption with the lower demand exhibited in 1985/86.

Forecast 1986/87 coarse grain imports for the Soviet Union were increased a million tons this month, in part to cover the projected shortfall in the 1986 coarse grain crop. The crop forecast was lowered 5 million tons to 86 million tons with a 3 million ton cut in corn and a 2 million tons cut in barley. Soviet 1986/87 coarse grain imports are forecast at 17 million tons, up from 1985/86 but still well below the 27 million tons imported in 1984/85.

In 1986/87 as corn, particularly U.S. corn, becomes less expensive relative to other grains, the corn share of world coarse grain trade is expected to increase from recently low levels. This trend in increased corn imports should be seen in a number of importing countries which are expected to increase the use of imported corn at the expense of feed wheat and barley.

EUROPEAN COMMUNITY

Continued hot, dry weather in West Germany and Spain has lowered EC barley crop prospects to 46 million tons, nearly 5 million tons less than the 1985 crop. The hot weather has caused some premature ripening, particularly of barley for malt, which is expected to lower the malting quality. The impact on quality is not expected to influence the 1986/87 EC barley export forecast which remains unchanged at 6 million tons because of ample carry-over stocks. However, a significant reduction in malting barley quality will likely increase the demand for imported malting barley.

Forecast EC 1986/87 coarse grain imports were increased marginally this month, reflecting the higher imported barley demand and a possible increase in the demand for corn imports for starch production. The dry weather has also caused a significant decline in the French corn crop forecast, which was lowered 800,000 tons to 11 million tons. French corn production accounts for more than 50 percent of EC corn production with the largest proportion being used for feed. This shortfall in corn production will likely be met by increased feeding of EC wheat and barley but any further decline in the production of corn for starch could result in larger EC corn imports.

MAJOR EXPORTING COUNTRIES

Competitor October-September 1986/87 coarse grain exports are forecast marginally lower this month, as declines in the Thai corn and Australian barley export forecasts were only partially offset by an increase in Canadian barley exports. At approximately 43 million tons, foreign coarse grain trade is nearly 4 million tons less than in 1985/86, largely because of the significant increase in expected corn trade and U.S. corn exports, in particular. Larger U.S. coarse grain exports should also cause a significant decline in competitor share of world coarse grain trade, competitor market share is expected to fall nearly 10 percent from 1985/86 to 1986/87.

The 1986 Canadian barley crop is now forecast at 13 million tons, up a million tons from last month's forecast and the largest crop in 4 years. Canadian barley export prospects are marginally higher this month because of the larger exportable supplies, reduced competition from a smaller Australian barley crop, and the possible increase in import demand by the EC where high quality malting barley may be in short supply. The 1986/87 Canadian export forecast is 4.5 million tons, about a million tons more than forecast 1985/86 exports.

On the other hand, reduced area and dry weather have contributed to a 300,000 ton reduction in the 1986 Australian barley crop forecast. At 3.6 million tons, the crop is the smallest in 6 years. An aggressive 1985/86 export program has reduced Australian carryover stocks to approximately 93,000 tons, close to the minimum historical level. Therefore, the smaller crop is expected to directly reduce exportable supplies and result in October-September 1986/87 barley exports of 2.4 million tons, about half the level exported in 1984/85.

Discouraged by low world corn prices, Thailand's farmers are expected to switch more corn area to manioc in 1986. Therefore, the Thai crop estimate was lowered half-a-million tons this month to 4.2 million tons. Thailand's 1986/87 coarse grain export forecast at 3.2 million is 400,000 tons less than last month's forecast because of the expected smaller corn supplies.

U.S. TRADE PROSPECTS

U.S. 1986/87 coarse grain export prospects improved slightly this month because of increased barley export prospects to several EEP targeted countries. The 1986/87 forecast for U.S. barley exports increased 200,000 tons this month, to 1.2 million tons. The more than 2-fold increase in U.S. barley exports from a year ago is entirely due to expected EEP sales. The 1986/87 U.S. corn export forecast remains unchanged at 39.4 million tons as increased Soviet demand offset the lower imports forecast for Mexico. U.S. coarse grain exports are now forecast at 46.8 million tons, up 200,000 tons from last month's forecast and 11 million tons more than in 1985/86. Despite this apparent recovery, forecast coarse grain exports, with the exception of 1985/86, remain at the lowest level since 1974/75.

RICE

The world trade estimate for CY 1986 remains at 12.3 million tons, compared with 11.5 million tons in CY 1985. The primary reason for the increase in trade over the 1985 level is the substantial import demand by Brazil. This demand is expected to diminish somewhat in 1987 as reflected in the trade forecast of 11.9 million tons.

The forecast for the 1986/87 world rice crop is 470.3 million tons, down slightly from last month's estimate due to a decrease in Indonesian production.

World production conditions continue to support the large 1986/87 rice crop forecast. Asian rice production progresses favorably as it has for the past several years. A substantial 1986/87 crop for major exporting countries could potentially increase exportable world supplies, further dampening world prices. Reports of dry conditions in some rice producing areas of Thailand are not expected to seriously affect the 1986/87 Thai crop.

MAJOR IMPORTING COUNTRIES

The import estimates for several countries were decreased this month while the import estimate for Brazil was again increased. The estimate for Iran was reduced from 750,000 tons to 700,000 tons for both CY 1986 and 1987. Although Iran has reportedly purchased rice from Pakistan recently, import commitments to date total only about 400,000 tons. The CY 1986 import estimate for Vietnam was lowered to 500,000 tons as import commitments total less than 400,000 tons, with no major recent purchases reported. Brazil's large June purchases will likely result in at least 800,000 tons of imports, which when added to the near 400,000 tons imported in early 1986, support the current estimate of 1.2 million tons for CY 1986.

MAJOR EXPORTING COUNTRIES

There were no changes in this month's export estimates for CY 1986, or in the export forecasts for CY 1987. Thailand maintained a record calendar year export pace through July, reportedly exporting more than 2.9 million tons during the period January-July 1986.

U.S. TRADE PROSPECTS

The U.S. export estimate for the 1986/87 market year which began August 1st, remains at 2.6 million tons. Total commitments of U.S. rice for the new marketing year were 790,000 tons as of August 7. The current trade outlook for U.S. rice looks promising as prices are much more competitive than in recent years. At least 150,000 tons of FY 1986 PL-480 sales have yet to be made. Additionally, Iraq is expected to purchase at least 100,000 tons of U.S. rice in the remaining months of fiscal year 1986. The forecasts for U.S. CY 1986 and 1987 are unchanged at 2.2 and 2.6 million tons respectively.

NOTE: "STOCKS AS PERCENT OF UTILIZATION" REPRESENT THE RATIO OF MARKETING YEAR ENDING STOCKS TO TOTAL UTILIZATION.

- 1/ TRADE DATA AS EXPRESSED IN THIS TABLE EXCLUDE INTRA-EC TRADE. WHEAT AND COARSE GRAINS ARE ON A JULY/JUNE TRADE YEAR THROUGH 1975/76. FROM 1976/77 ON, THE TRADE YEAR FOR COARSE GRAINS IS OCTOBER/SEPTEMBER.
- 2/ FOR COUNTRIES FOR WHICH STOCKS DATA ARE NOT AVAILABLE (EXCLUDING THE USSR) UTILIZATION ESTIMATES REPRESENT "APPARENT" UTILIZATION, I.E. INCLUDE ANNUAL STOCK LEVEL ADJUSTMENTS.
- 3/ STOCKS DATA ARE BASED ON AN AGGREGATE OF DIFFERING LOCAL MARKETING YEARS AND SHOULD NOT BE CONSTRUED AS REPRESENTING WORLD STOCK LEVELS AT A FIXED POINT IN TIME. STOCKS DATA ARE NOT AVAILABLE FOR ALL COUNTRIES AND EXCLUDE THOSE SUCH AS THE PEOPLE'S REPUBLIC OF CHINA AND PARTS OF EASTERN EUROPE. WORLD STOCK LEVELS HAVE BEEN ADJUSTED FOR ESTIMATED YEAR-TO-YEAR CHANGES IN USSR GRAIN STOCKS, BUT DO NOT PURPORT TO INCLUDE THE ABSOLUTE LEVEL OF USSR GRAIN STOCKS.
- 4/ PRELIMINARY.
- 5/ PROJECTION.

FOOTNOTES TO WORLD GRAIN SUMMARY AND TRADE TABLES

- 1) Includes wheat flour and products.
- 2) Argentina, Australia, Canada, South Africa, and Thailand.
- 3) Adjusted for transshipment through Canadian ports: excludes products other than flour.
- 4) Wheat, rye, corn, barley, oats, sorghum, millet, and mixed grains.
- 5) Production data includes all harvests occurring within the July-June year indicated, expect that small grain crops from the early harvesting Northern Hemisphere areas are "moved forward" i.e., the May 1984 harvests in areas such as India, North Africa, and southern United States are actually included in "1984/85" accounting period which begins July 1, 1984, for wheat or October 1, 1984, for coarse grains.
- 6) "Bunker weight" basis; not discounted for excess moisture and foreign material.
- 7) Utilization data are based on an aggregate of differing local marketing years. For countries for which stocks data are not available (excluding the USSR) utilization estimates represent "apparent" utilization; i.e., they are inclusive of annual stock level adjustments.
- 8) Stocks data are based on aggregate of differing local marketing years and should not be construed as representing world stock level at a fixed point in time. Stocks data are not available for all countries and exclude those such as the People's Republic of China, and parts of Eastern Europe. The world stocks level has been adjusted for estimated year-to-year changes in the USSR grain stocks, but do not purport to include the entire absolute level of USSR stocks.
- 9) Inclusive of Soviet stock changes; see footnote 8.

For further details on the world grain production and USSR outlook see "World Crop Production" Foreign Agriculture Circular WCP-7-86, August 13, 1986, and "USSR Grain Situation and Outlook" Foreign Agriculture Circular SG-8-86, August 1986.

Do you need information about

- Overseas markets and buying trends?
- New competitors and products?
- Trade policy developments?
- Overseas promotional activities?

Then **Foreign Agriculture** — USDA's fact-filled monthly agricultural trade magazine — is for you. Based on official USDA data available nowhere else, **Foreign Agriculture** articles are clear and crisp, written to provide the export information you need, in a concise and extremely readable form.

Special information is found in **Foreign Agriculture's** telegraphed, targeted news departments: Fact File, Country Briefs, Trade Updates and Marketing News. And its tables and graphs will give you an immediate grasp of what's going on overseas.

In addition, periodic special issues—such as the one devoted entirely to value-added exports—will give you a wide range of detailed information about overseas markets.

If you use agricultural facts and figures in your business, you need **Foreign Agriculture**.

Subscribe today! Just \$16.00 (\$20.00 for foreign delivery) brings you Foreign Agriculture for 12 full months.

FAS Circulars: Market Information For Agricultural Exporters

As an agricultural exporter, you need timely, reliable information on changing consumer preferences, needs of foreign buyers, and the supply and demand situation in countries around the world.

The Foreign Agricultural Service can provide that information in its commodity circulars.

World agricultural information and updates on special FAS export services for the food and agricultural trade all are available in these periodic circulars.

For a sample copy of these reports—which can supply you with the information you need to make sound business decisions—check the box indicated, fill out the address form and mail it today.

To subscribe: Indicate which publications you want. Send a check for the total amount payable to the Foreign Agricultural Service. Only checks on U.S. banks, cashier's checks, or international money orders will be accepted. NO REFUNDS CAN BE MADE. Mail this form to: Foreign Agricultural Service

Grains

World Grain Situation and Outlook

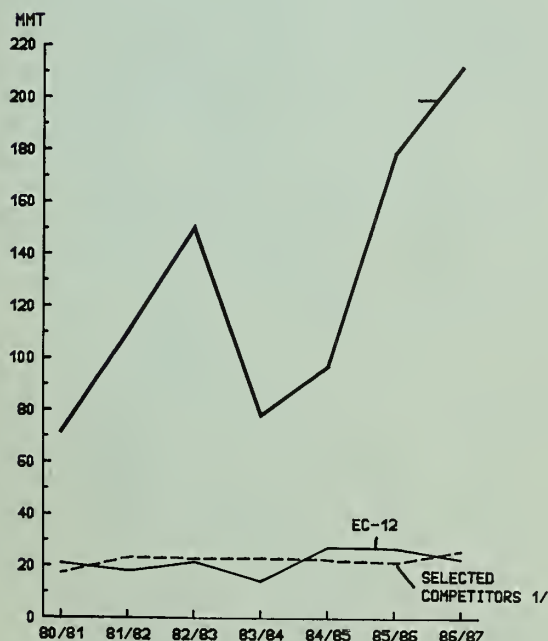

FG-11-86

September 1986

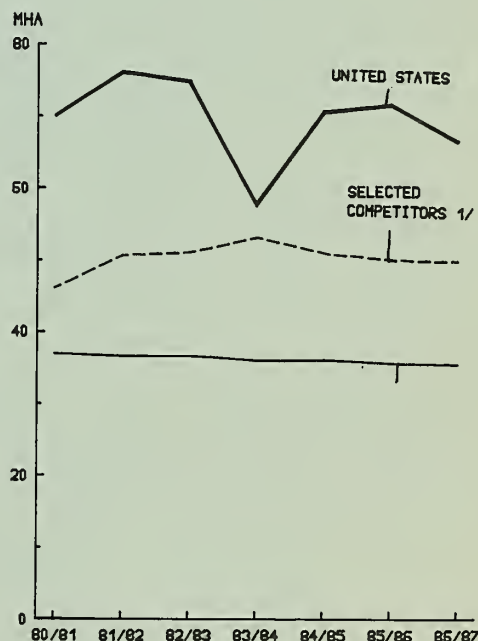

Associated with the developing oversupply situation for grains over the past several seasons has been an unprecedented increase in world stock levels which have not only had a depressing effect on prices, but have also lead to heavy storage costs. Contrasting stocks with changes in grains area, this month's cover graphs show how the burden of carrying stocks has been distributed among the major grain exporting countries, and how farmers in these countries have reacted in their plantings to conditions of oversupply. Up to now reaction has been largely in the United States, with foreign adjustments becoming evident only to a limited extent in current Southern Hemisphere planting intentions. To date, it would appear that farmers in many countries have been prevented from reacting to conditions of oversupply in the grains sector, perhaps because of a lack of alternatives, or perhaps because of the way some domestic support systems insulate producers from the market's signals.

WORLD GRAIN SITUATION/OUTLOOK

After several seasons of delay, clearly illustrated on this month's cover, there are initial indications that lower world grain prices are beginning to influence consumption patterns and production plans in some countries. The 20-25 percent decline in world grain prices since 1985/86, and the similar fall in U.S. prices, has caused upward revisions in several foreign countries' import and consumption estimates, and a slowdown in the expansion of other countries' production. Such indications are particularly important for U.S. exports, since the United States occupies a position of residual supplier for certain grains in the world market.

For example, Brazil has recently purchased 800,000 tons of rice in a government decision to rebuild domestic stocks and stimulate increased domestic consumption by lowering internal prices. Lower world rice prices undoubtedly contributed to this purchase, the single largest Brazilian rice purchase on record. Another example is Argentina, where sharply lower world corn prices have reduced the expected returns from exporting corn and depressed internal prices, which in turn has encouraged an increase in on-farm feeding and domestic use. An initial production response is illustrated by the expected reduction in Australian rice and barley areas which are 25 and 20 percent lower than in 1985, respectively. Other production adjustments, as shown on the cover, are expected to require more time before they become readily apparent.

Highlights in this month's world grain situation include:

- Larger exportable supplies of Canadian wheat and barley.
- Increased 1985/86 and 1986/87 Chinese corn export forecasts.
- Another decline in the European Community's (EC) grain crop estimate which is expected to mean larger corn imports in 1986/87.
- Reduced 1985/86 and 1986/87 Argentine corn export prospects.
- East European developments which are expected to increase wheat and coarse grain trade.
- A higher 1986/87 barley import forecast for Saudi Arabia.

****WHEAT SITUATION****

World wheat prices continued to trend downward in August, led by a \$30-per-ton decline in posted Canadian prices as new-crop wheat became available. Australian and U.S. prices also weakened, continuing the decline seen in June and July. Factors contributing to the bearish market include the lack of Soviet buying and improved prospects for even larger exporter wheat supplies. The slow pace of Soviet purchases may reflect expectations for lower prices, reduced hard currency availabilities, changes in the Soviet grain purchasing contracts, and temporarily reduced demand because of a bumper forage crop. The 1986/87 world wheat trade forecast is virtually unchanged from last month at 91.4 million tons, 6 million tons higher than in 1985/86 but still well below the level of the early 1980's.

MAJOR IMPORTING COUNTRIES

This month, marginal increases in the wheat import forecasts for Morocco, Indonesia, and Eastern Europe have been offset by lower forecasts in Chile, Iran, and Iraq. The higher wheat import forecasts for Morocco and Indonesia reflect increased consumption in the previous year which is now expected to continue in 1986/87.

In Eastern Europe, the wheat crops in Hungary and Yugoslavia have been severely damaged by drought; yields are forecast 10-15 percent below last year. The decline in outturn will likely mean increased demand for imported wheat, particularly inexpensive feed wheat which may be used in place of domestic coarse grains. These coarse grains could then be exported to generate foreign currency. Lower wheat availabilities could also limit exports; this is reflected in a 200,000 ton reduction in the 1986/87 East European export forecast to 2.2 million tons.

MAJOR EXPORTING COUNTRIES

Competitor (Canada, Australia, and Argentina) 1986/87 wheat export forecasts total 38.6 million tons which is unchanged from last month and nearly equal to 1985/86. In 1985/86, this level accounted for approximately 47 percent of world wheat trade. In 1986/87, because of an increase in total trade and the expected effect of price competitive U.S. wheat, this level will account for only 42 percent of world trade.

The Canadian 1986 crop forecast is 1.5 million tons higher this month, at a record 31 million tons. However, larger production is not expected to increase exports because of excess world supplies, intensifying competition, the Thunder Bay dock strike which could limit shipments, and little if any growth expected for the Canadian share of several major markets' import demand. A higher forecast would assume that the Canadian Wheat Board would find substantial new markets, therefore the 1986/87 export forecast is unchanged at 19.5 million tons.

The 1986/87 Australian guaranteed minimum producer price of \$130.62 per ton was recently announced. The 13 percent decline from last year's Australian price does not reflect the entire 20-25 percent decline generally expected for 1986/87 world wheat prices. Australian and Argentine 1986/87 export and crop forecasts are unchanged from last month.

In the European Community, continued bad weather contributed to an additional 1.2-million-ton decline in the crop forecast, which will likely mean increased trade between EC countries, as surplus U.K., West German, and French wheat moves to Spain and other deficit areas. Increased EC intra-trade and the high cost of subsidizing exports may limit EC third-country exports as reflected in the 15-million-ton 1986/87 export forecast, down 500,000 tons from 1985/86. However, the EC still has large carryover stocks; currently in excess of 16 million tons, which could be available for export.

The 1986/87 wheat export forecast for the United States is 31.5 million tons, unchanged from last month. Although up significantly from 1985/86, this forecast is still well below the trade levels achieved in the early 1980's. This month, the lack of Soviet buying and the Canadian dock strike, which could have opposite effects on U.S. export opportunities, increased the uncertainty of the U.S. export outlook.

COARSE GRAINS SITUATION

Coarse grain prices have fallen markedly in recent months following the decline in the U.S. loan rates and the lower prices offered in subsidized EC and U.S. barley sales. An initial indication that U.S. corn is in fact more price competitive may be the increased sales for the first week of September. This month, the situation focused on larger supplies of exportable Canadian barley, the aggressive Chinese corn export program, reduced exportable supplies of Argentine corn, and stronger import demand in Saudi Arabia and the EC which could increase 1986/87 coarse grain trade.

MAJOR IMPORTING COUNTRIES

World coarse grain imports in 1986/87 are forecast nearly 1.5 million tons higher this month, at 91.4 million tons due primarily to larger import demand in Saudi Arabia, Eastern Europe, and the EC. The 1986/87 barley import forecast for Saudi Arabia rose 900,000 tons to 6.5 million tons, reflecting increased usage and stock levels encouraged by low world prices and an attractive import subsidy; conditions which are expected to continue in 1986/87. In Eastern Europe, drought lowered Hungarian corn crop prospects, which could mean increased imports, some of which will probably be supplied by bumper Yugoslavian and Romanian crops.

The 1986 EC-12 barley crop forecast was reduced an additional 500,000 tons this month, to 45.9 million tons, 6 million tons lower than in 1985. Combined with the poor French corn crop, the 1986 EC coarse grain crop is 10 percent lower than last year. This shortfall should mean increased demand for imported grain in certain countries, particularly Spain, which may in part be met by larger imports of EC grains. However, additional coarse grains will likely be imported from third-countries, such as the United States. The higher demand for non-EC imports is reflected in a million tons increase in the 1986/87 EC corn import forecast.

MAJOR EXPORTING COUNTRIES

Competitor (Canada, Argentina, Australia, Thailand, and South Africa) coarse grain production is forecast 2.2 million tons higher this month, as improved Canadian barley crop prospects were only partially offset by the decline in the EC barley forecast. Canadian 1986 barley production is now forecast at a record 14.7 million tons, 1.7 million tons greater than last month. The increase in exportable supplies was not entirely reflected in the export forecast as intense competition from Australia, the EC and the United States will likely continue, and the dock strike could limit barley exports.

The 1985/86 and 1986/87 Chinese corn export forecasts were each increased 500,000 tons from last month's forecasts to reflect the unexpectedly aggressive pace of 1985/86 exports. China has recently exported between 5 and 6 million tons of corn per year because of the need for hard currency and other government policies.

In Argentina, falling corn prices have diminished the incentive to export and encouraged increased domestic feeding. The 1985/86 and 1986/87 Argentine corn export forecasts were lowered 1.5 and 1.0 million tons, respectively as exportable supplies were reduced by higher domestic consumption and an adjustment to the 1985 production estimate.

Bumper Romanian and Yugoslavian corn crops are forecast for 1986, which will mean increased exportable supplies and probably larger corn exports by these East European countries. On the other hand, the shortfall in Hungary could also provide a ready market for some of these corn exports.

The 1986/87 U.S. coarse grain export forecast is 46.8 million tons, unchanged from last month as increased Chinese supplies offset lower expectations in Argentina. Increased export opportunities in the European Community should help to balance lower demand for imported coarse grains in a number of smaller countries expecting better crops. Corn sales in the first week of the new marketing year (starting September 1) exceeded 800,000 tons, the highest weekly level since mid-January 1986. Major buyers included Japan, Taiwan, and Korea; markets where U.S. corn exports have been displaced by foreign corn throughout much of 1985/86.

RICE SITUATION

The world rice trade estimate for calendar year 1986 was increased this month in light of substantial imports by North Korea and continuing large shipments by Thailand. World trade is now estimated at 12.5 million tons for 1986, compared to 11.5 million tons in 1985. The increase from calendar year 1985 to 1986 is largely attributable to imports by Brazil and Peru. World demand, however, is expected to slacken for the last quarter of 1986 as the new crop is harvested. The world trade forecast for calendar year 1987 is unchanged at 11.9 million tons.

The world rice production estimate for 1986/87 remains essentially unchanged this month at 470 million tons, which if realized, would be another record crop year. Favorable world production conditions continue to support this forecast. The only notable change this month was an increase in Brazil's 1985/86 production forecast from 9.5 to 10.0 million tons.

MAJOR IMPORTING COUNTRIES

Two changes were made this month in the import estimates of North Korea and the Philippines. The North Korean import estimate for CY 1986 was raised from zero to 200,000 tons due to recent imports of broken rice, of which commitments for 150,000 tons have been made to date. Additionally, the Philippines estimate was decreased from 150,000 to 100,000 tons as no imports have been made yet and a favorable 1986/87 crop is expected.

MAJOR EXPORTING COUNTRIES

The only change in estimates of major exporters this month was in Thailand's CY 1986 estimate, which was raised from 4.2 to 4.4 million tons based on record shipments through August, 1986. Generally, world demand is expected to diminish for the remainder of the year.

U.S. exports for the 1985/86 marketing year totaled 1,884,000 tons, down from 1,905,000 in 1984/85. Total commitments of U.S. rice for the new marketing year (August/July) were 958,000 tons as of September 4. The CY 1986 and 1987 U.S. export estimates are unchanged at 2.2 and 2.6 million tons, respectively.

1/ FEED USE DATA ARE UNAVAILABLE FOR CHINA.

2/ FOR CHINA, UTILIZATION ESTIMATES REPRESENT "APPARENT" UTILIZATION, I.E. THEY INCLUDE ANNUAL STOCK LEVEL ADJUSTMENTS THOUGH NO STOCKS DATA ARE AVAILABLE.

3/ PRELIMINARY.

4/ PROJECTION.

5/ COARSE GRAINS INCLUDE BARLEY, RYE, OATS, CORN, SORGHUM, AND MILLET. EXCLUDED ARE MISCELLANEOUS GRAINS, PULSES AND RICE.

SOURCES: PREPARED OR ESTIMATED ON BASIS OF OFFICIAL STATISTICS OF FOREIGN GOVERNMENTS, OTHER FOREIGN SOURCE MATERIALS, REPORTS OF U.S. AGRICULTURAL ATTACHES AND FOREIGN SERVICE OFFICERS, RESULTS OF OFFICE RESEARCH, AND RELATED INFORMATION.

NOTE: "STOCKS AS PERCENT OF UTILIZATION" REPRESENT THE RATIO OF MARKETING YEAR ENDING STOCKS TO TOTAL UTILIZATION.

- 1/ TRADE DATA AS EXPRESSED IN THIS TABLE EXCLUDE INTRA-EC TRADE. WHEAT AND COARSE GRAINS ARE ON A JULY/JUNE TRADE YEAR THROUGH 1975/76. FROM 1976/77 ON, THE TRADE YEAR FOR COARSE GRAINS IS OCTOBER/SEPTEMBER.
- 2/ FOR COUNTRIES FOR WHICH STOCKS DATA ARE NOT AVAILABLE (EXCLUDING THE USSR) UTILIZATION ESTIMATES REPRESENT "APPARENT" UTILIZATION, I.E. INCLUDE ANNUAL STOCK LEVEL ADJUSTMENTS.
- 3/ STOCKS DATA ARE BASED ON AN AGGREGATE OF DIFFERING LOCAL MARKETING YEARS AND SHOULD NOT BE CONSTRUED AS REPRESENTING WORLD STOCK LEVELS AT A FIXED POINT IN TIME. STOCKS DATA ARE NOT AVAILABLE FOR ALL COUNTRIES AND EXCLUDE THOSE SUCH AS THE PEOPLE'S REPUBLIC OF CHINA AND PARTS OF EASTERN EUROPE. WORLD STOCK LEVELS HAVE BEEN ADJUSTED FOR ESTIMATED YEAR-TO-YEAR CHANGES IN USSR GRAIN STOCKS, BUT DO NOT PURPORT TO INCLUDE THE ABSOLUTE LEVEL OF USSR GRAIN STOCKS.
- 4/ PRELIMINARY.
- 5/ PROJECTION.

WORLD WHEAT EXPORT PRICES (BASIS FOB, U.S. DOLLARS PER METRIC TON)

WORLD CORN EXPORT PRICES (BASIS FOB, U.S. DOLLARS PER METRIC TON)

FOOTNOTES TO WORLD GRAIN SUMMARY AND TRADE TABLES

- 1) Includes wheat flour and products.
- 2) Argentina, Australia, Canada, South Africa, and Thailand.
- 3) Adjusted for transshipment through Canadian ports: excludes products other than flour.
- 4) Wheat, rye, corn, barley, oats, sorghum, millet, and mixed grains.
- 5) Production data includes all harvests occurring within the July-June year indicated, except that small grain crops from the early harvesting Northern Hemisphere areas are "moved forward" i.e., the May 1984 harvests in areas such as India, North Africa, and southern United States are actually included in "1984/85" accounting period which begins July 1, 1984, for wheat or October 1, 1984, for coarse grains.
- 6) "Bunker weight" basis; not discounted for excess moisture and foreign material.
- 7) Utilization data are based on an aggregate of differing local marketing years. For countries for which stocks data are not available (excluding the USSR) utilization estimates represent "apparent" utilization; i.e., they are inclusive of annual stock level adjustments.
- 8) Stocks data are based on aggregate of differing local marketing years and should not be construed as representing world stock level at a fixed point in time. Stocks data are not available for all countries and exclude those such as the People's Republic of China, and parts of Eastern Europe. The world stocks level has been adjusted for estimated year-to-year changes in the USSR grain stocks, but do not purport to include the entire absolute level of USSR stocks.
- 9) Inclusive of Soviet stock changes; see footnote 8.

FAS Circulars: Market Information For Agricultural Exporters

As an agricultural exporter, you need timely, reliable information on changing consumer preferences, needs of foreign buyers, and the supply and demand situation in countries around the world.

The Foreign Agricultural Service can provide that information in its commodity circulars.

World agricultural information and updates on special FAS export services for the food and agricultural trade all are available in these periodic circulars.

For a sample copy of these reports—which can supply you with the information you need to make sound business decisions—check the box indicated, fill out the address form and mail it today.

To subscribe: Indicate which publications you want. Send a check for the total amount payable to the Foreign Agricultural Service. Only checks on U.S. banks, cashier's checks, or international money orders will be accepted. NO REFUNDS CAN BE MADE. Mail this form to: Foreign Agricultural Service

World Grain Situation and Outlook

FG-12-86
October 1986

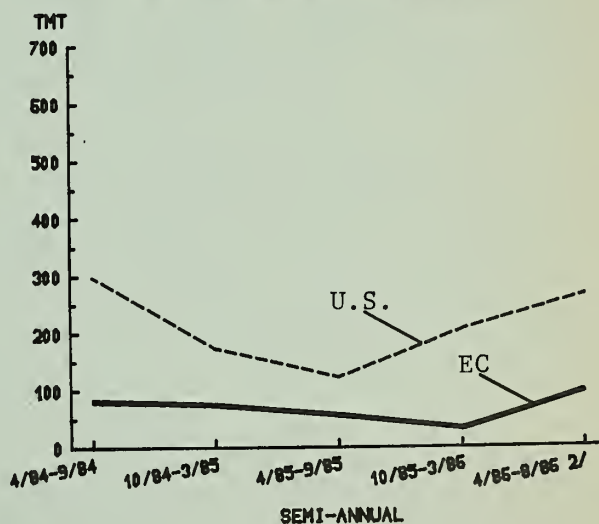

This month's cover report indicates recent changes in trade patterns for wheat, especially among selected origins and destinations affected by the Export Enhancement Program (EEP), an interim U.S. measure for confronting subsidized competition. To show these trade changes, the graphs focus upon markets in North Africa and the Middle East which in recent years have been markets for large amounts of subsidized European Community (EC) wheat. Shipments of U.S. wheat to these regions have increased sharply since September 1985, when sales under this program began. EC export rates declined in these regions through the beginning of 1986. Since then, EC export shipment levels to these regions have recovered, but remain below U.S. levels. It is likely that in the absence of the EEP pricing arrangements, U.S. shipment rates to these areas would have remained at the 1984/85 season levels, or lower, and that EC shipments would have been much larger. At the same time, it is also generally accepted that some portion of the foreign wheat from subsidizing origins which is being displaced by EEP wheat in these markets will make partly offsetting gains against U.S. wheat in markets elsewhere that are not eligible for EEP.

WORLD GRAIN SITUATION/OUTLOOK

This month, sharply lower current-year grain import expectations for a number of major markets including the Soviet Union, the European Community (EC), and Mexico overshadowed any modest recovery of demand which may be occurring in response to lower world grain prices. Key developments include:

- Reduced grain import prospects for the Soviet Union following an extended period of sluggish buying and a large increase in domestic availabilities because of a better crop outlook.
- A half-million-ton decline in the Mexican corn import forecast because of improved crop prospects.
- A bigger, high-quality EC corn crop which will likely mean a continued decline in corn imports for North European starch production.
- The further erosion of EC corn imports because of the growing substitution of wheat and barley in Spanish feed rations.
- Sharp declines in world grain prices led mainly by increased EC export subsidy rates and, in the case of Wheat Board countries, sales at prices which, for the first time in many years, could require end-of-season government payments to cover guaranteed payments to growers.
- The month long Canadian dock strike and backlog of new crop grain which has lowered 1986/87 wheat export prospects.
- Reduced U.S. wheat and corn export prospects for 1986/87.
- A-million-ton increase in the 1986/87 U.S. barley export forecast reflecting increased sales aided by the Export Enhancement Program (EEP).

WHEAT SITUATION

The outlook for world wheat trade continued to decline this month, as exporter competition intensified, buying remained unexpectedly sluggish, and foreign prices weakened.

MAJOR IMPORTING COUNTRIES

World wheat trade is forecast at 89.1 million tons, down 3 million tons from last month as crop prospects, primarily in the Soviet Union, improved and demand for imported wheat declined. Near-record outturn in other importing countries has also limited trade prospects. The 1986/87 trade forecast shows some recovery from 1985/86, but remains more than 14 million tons or nearly 15 percent below the level of import demand exhibited in the early 1980's.

July-June 1986/87 wheat imports for the Soviet Union at 16 million tons are forecast 3 million tons lower than last month's forecast and just about equal to 1985/86. The decline in import expectations is attributed to a number of factors including better crop prospects, near-record forage supplies, the slow buying pace for the first quarter 1986/87, and reduced foreign currency supplies. Soviet wheat imports last fell to this level in 1980/81 when wheat production exceeded 98 million tons. However, the 1986 crop is reportedly of better milling quality.

On the other hand, the Brazilian government continues to take advantage of low world grain prices to increase imports and stimulate domestic consumption. The July-June 1986/87 Brazilian wheat import forecast was raised to 3 million tons which is 500,000 tons more than in 1985/86.

MAJOR EXPORTING COUNTRIES

Lower demand for imported wheat in 1986/87 relative to last month and Canadian labor problems from ongoing dock strikes have resulted in sizable cuts in the U.S. and Canadian wheat export forecasts. These cuts were only partially offset by higher forecasts for several less traditional exporters, including East Germany and Pakistan.

The month-long Thunder Bay dock strike, a back-log of new-crop grain, and prospects for further labor problems in Vancouver probably resulted in some lost Canadian wheat sales. The Canadian July-June 1986/87 wheat export forecast at 18.5 million tons is down 1 million tons from last month's forecast. Furthermore, rain in the Prairie Provinces may have resulted in some lodged and sprouted wheat which could impact future higher-quality wheat sales. Even with adequate supplies of high quality wheat, Canadian wheat liftings for the remainder of 1986/87 will have to approach record levels to meet the current forecast.

Good crops have increased the probability of large excess supplies of exportable wheat in several Eastern European countries and Pakistan. The East European exports, in particular, reflect the desire to increase hard currency earnings, but low world prices and intense competition from other exporting countries could limit these sales. In the case of Pakistan, increased export prospects are dependent upon a trade agreement with Iran.

This month, the European Community appears to have intensified its aggressive export posture with large subsidies and a million-ton sale to the Soviet Union - the subsidy was nearly \$130 per ton. The wheat export subsidy to other countries has also been increased in recent weeks, and wheat/flour export licenses have surged to more than 3 million tons which is slightly less than the licenses available for the same period in 1985.

The July-June 1986/87 wheat export forecast for the United States was reduced 2 million tons to 29.5 million tons because of a reduced forecast of world import needs, including lower Soviet demand.

****COARSE GRAIN SITUATION****

The world coarse grain situation this month is characterized by higher foreign crop forecasts and a reduced reliance on imported grains. World coarse grain trade is forecast at 89.1 million tons for October-September 1986/87, down 3 million tons from last month's forecast.

MAJOR IMPORTING COUNTRIES

The 1986 corn crop estimates for Mexico, the Soviet Union, and a group of other importers rose more than 5.5 million tons this month, increasing production in these countries by approximately 3 percent and lowering markedly the demand for imported corn. In Mexico, good weather has improved crop prospects to an estimated 10 million tons, up 1 million tons from last month. Mexican 1986/87 corn imports are forecast half-a-million tons lower at 2.5 million tons, but nearly double 1985/86 corn imports. The U.S., with ample available credit, should supply the bulk of Mexican coarse grain needs.

The Soviet Union October-September 1986/87 coarse grain import forecast was lowered a million tons from last month's forecast to 16 million tons, reflecting higher domestic coarse grain outturn, the continued slow pace of purchases, and in the case of U.S. corn, displacement by Canadian and EC barley, and Yugoslavian corn. The decline in corn imports was partially offset by higher barley import expectations.

The largest single decline in import demand is the 1.5-million-ton cut in the EC corn import forecast because of a larger Italian corn crop and the reported good quality of the French crop. Both of these crops may be utilized by EC starch industries or Spain's feed compounders which will probably result in the continued decline of EC corn imports. The U.S.-EC compensation agreement for Spain's accession will probably not result in as large an increase in corn imports as previously thought.

An upward revision in Brazil's 1986/87 corn import forecast to 1.0 million tons follows reports that the government intends to authorize increased imports and encourage the use of CCC credit. While down from last year, this level of imports is nearly double that of the early 1980's and could represent an initial response to lower world grain prices.

MAJOR EXPORTING COUNTRIES

The competitors (Australia, Argentina, Canada, Thailand, and South Africa) October-September 1986/87 coarse grain export forecasts remain unchanged from last month. Significantly lower demand for imported coarse grains reduced U.S. corn export prospects relative to other coarse grains because: 1) U.S.-EC barley competition has driven barley prices down to the point where barley is often the better buy and 2) larger domestic importer supplies are forecast in corn markets and not so much in barley or sorghum markets.

The 1986/87 U.S. coarse grain export forecast was lowered 2.8 million tons to 44 million tons, as a million ton increase in the barley export forecast partially offset the 3.8-million-ton decline in the corn export forecast. Lower import demand, particularly in the Soviet Union, EC, and Mexico account for most of the decline in this year's U.S. corn export forecast, whereas early-season declines in last year's export forecast largely reflected displacement of U.S. corn by other exporters. The U.S. EEP is expected to increase 1986/87 barley exports to 2.2 million tons, up 1 million tons from last month's forecast and the highest level in 6 years.

Some nontraditional corn exporters, particularly China, are expected to again impact 1986/87 trade; Kenya and Yugoslavia also have exportable supplies. While these relatively small supplies could displace some U.S. and South African corn, intensive competition and low prices could limit final exports.

In the EC barley export subsidies are up 60 percent from the beginning of the July-June marketing year and export licenses are nearly double a year ago. The 1986/87 EC barley export forecast was increased 500,000 tons reflecting this aggressive posture and large early sales reportedly to Saudi Arabia.

RICE SITUATION

World supply and demand for rice was basically unchanged this month. World trade is now estimated at 12.6 million tons for calendar year 1986, compared to 11.5 million tons for 1985.

However, Nepal, a small exporter of rice since 1984, is now expected to import 25,000 tons in calendar year 1986 due to a poor 1986/87 crop. The government food agency of Peru, ECASA, has also indicated that Peru will require about 100,000 tons of rice before the end of calendar 1986, and an additional 150,000 tons for early 1987. The calendar year 1986 estimate and 1987 forecast for Peru are unchanged at 260,000 and 200,000 tons, respectively.

The only change for exporting countries this month was an increase in the 1986 Pakistan calendar year export estimate from 1 million to 1.1 million tons. Also, the Pakistan estimate for marketing year 1986/87 was raised from 1.0 million to 1.2 million tons. The increase for Pakistan is attributed to an aggressive Pakistani export policy.

The U.S. calendar year 1986 export estimate is unchanged at 2.2 million tons. U.S. exports through August totaled 1.4 million tons, which along with 105,000 in sales to Iraq and over 200,000 in PL 480 and Food for Peace exports for September and October, support the current estimate. The U.S. calendar year 1987 forecast remains unchanged at 2.6 million tons.

NOTE: "STOCKS AS PERCENT OF UTILIZATION" REPRESENT THE RATIO OF MARKETING YEAR ENDING STOCKS TO TOTAL UTILIZATION.

- 1/ TRADE DATA AS EXPRESSED IN THIS TABLE EXCLUDE INTRA-EC TRADE. WHEAT AND COARSE GRAINS ARE ON A JULY/JUNE TRADE YEAR THROUGH 1975/76. FROM 1976/77 ON, THE TRADE YEAR FOR COARSE GRAINS IS OCTOBER/SEPTEMBER.
- 2/ FOR COUNTRIES FOR WHICH STOCKS DATA ARE NOT AVAILABLE (EXCLUDING THE USSR) UTILIZATION ESTIMATES REPRESENT "APPARENT" UTILIZATION, I.E. INCLUDE ANNUAL STOCK LEVEL ADJUSTMENTS.
- 3/ STOCKS DATA ARE BASED ON AN AGGREGATE OF DIFFERING LOCAL MARKETING YEARS AND SHOULD NOT BE CONSTRUED AS REPRESENTING WORLD STOCK LEVELS AT A FIXED POINT IN TIME. STOCKS DATA ARE NOT AVAILABLE FOR ALL COUNTRIES AND EXCLUDE THOSE SUCH AS THE PEOPLE'S REPUBLIC OF CHINA AND PARTS OF EASTERN EUROPE. WORLD STOCK LEVELS HAVE BEEN ADJUSTED FOR ESTIMATED YEAR-TO-YEAR CHANGES IN USSR GRAIN STOCKS, BUT DO NOT PURPORT TO INCLUDE THE ABSOLUTE LEVEL OF USSR GRAIN STOCKS.
- 4/ PRELIMINARY.
- 5/ PROJECTION.

FOOTNOTES TO WORLD GRAIN SUMMARY AND TRADE TABLES

- 1) Includes wheat flour and products.
- 2) Argentina, Australia, Canada, South Africa, and Thailand.
- 3) Adjusted for transshipment through Canadian ports: excludes products other than flour.
- 4) Wheat, rye, corn, barley, oats, sorghum, millet, and mixed grains.
- 5) Production data includes all harvests occurring within the July-June year indicated, expect that small grain crops from the early harvesting Northern Hemisphere areas are "moved forward" i.e., the May 1984 harvests in areas such as India, North Africa, and southern United States are actually included in "1984/85" accounting period which begins July 1, 1984, for wheat or October 1, 1984, for coarse grains.
- 6) "Bunker weight" basis; not discounted for excess moisture and foreign material.
- 7) Utilization data are based on an aggregate of differing local marketing years. For countries for which stocks data are not available (excluding the USSR) utilization estimates represent "apparent" utilization; i.e., they are inclusive of annual stock level adjustments.
- 8) Stocks data are based on aggregate of differing local marketing years and should not be construed as representing world stock level at a fixed point in time. Stocks data are not available for all countries and exclude those such as the People's Republic of China, and parts of Eastern Europe. The world stocks level has been adjusted for estimated year-to-year changes in the USSR grain stocks, but do not purport to include the entire absolute level of USSR stocks.
- 9) Inclusive of Soviet stock changes; see footnote 8.

This circular was prepared by the Grain and Feed Division, Commodity Programs, FAS/USDA, Washington, D.C. 20250. Further information may be obtained by writing the Division or telephone (202) 447-2009.

World Grain Situation and Outlook

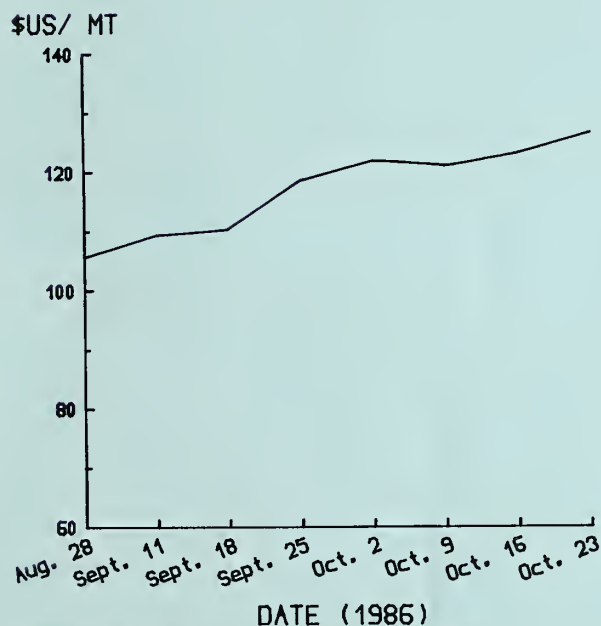

FG-13-86

November 1986

This month's cover graphs focus on the latest decline in prices of subsidized European Community (EC) wheat on the world market. Although price details are not disclosed on all EC export sales, those which were reported on recent sales showed a decline of roughly \$20 per ton during the period since late this last summer. As a result, EC offers within the Mediterranean basin have reached the point where the restitution level is about twice the cash value of the resulting sale. These increasing EC subsidies have contributed to declining world wheat prices which have recently reached the lowest levels since the early 1970's.

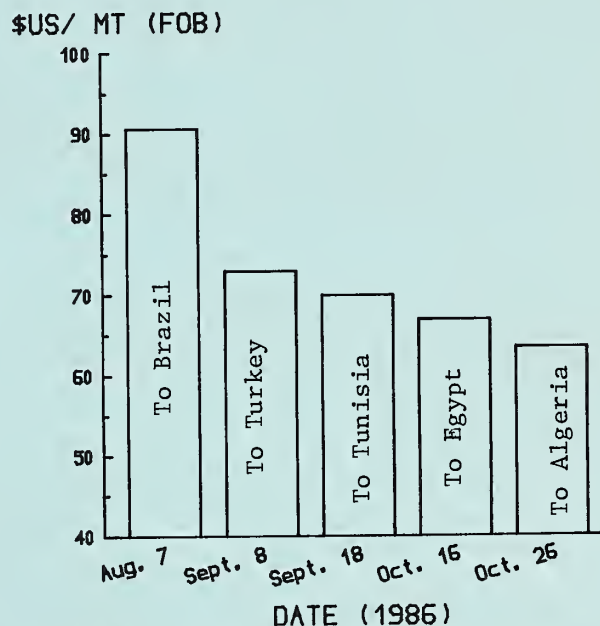

RECENT EXPORT SALE PRICES AND RESTITUTIONS (SUBSIDIES) FOR EC WHEAT

RESTITUTIONS 1/

1/ FREE MARKET RESTITUTION LEVELS ANNOUNCED WEEKLY BY THE EC COMMISSION; THE EC DID NOT ACCEPT BIDS SEPT. 4, 1986.

WORLD GRAIN SITUATION/OUTLOOK

Highlights this month include:

- Sharply lower USSR grain import forecasts because of improved crop prospects and an extremely slow pace of purchases.
- A 3.5-million-ton decline in the U.S. coarse grain export forecast based on reduced world trade.
- Lower export prospects for U.S. and Canadian wheat, as well as European Community (EC) wheat and barley, all reflecting intense market competition because of less Soviet demand.
- Rising corn import prospects in Brazil.
- Improved U.S. rice export prospects for calendar year 1986.
- Improving wheat crop prospects in Australia and China.
- Some indications of growing corn import needs for southern China.
- A sharp drop in coarse grain import prospects for Venezuela because of better crop prospects.

WHEAT SITUATION

World wheat trade is forecast 2.5 million tons lower this month at 86.6 million tons, due primarily to reduced demand for imported wheat by the Soviet Union. This second month-to-month change in world wheat trade is based largely on Soviet developments and emphasizes their importance in world grain trade. In the past two months, the forecast for world wheat trade has fallen more than 5 percent; largely because of the 5-million-ton decline in Soviet import prospects. However, in the world outside of the Soviet Union, wheat trade is forecast about 4 percent higher in 1986/87 than in 1985/86.

MAJOR IMPORTING COUNTRIES

The 1986/87 wheat import forecast for the Soviet Union was cut 2 million tons from last month's forecast because of improved crop prospects and modest buying activity so far this marketing year. Of the 14 million ton import forecast for 1986/87, the Soviet Union has reportedly purchased less than 6 million tons, well behind the buying activity for comparable periods in recent years. Domestic procurements of significantly more high-quality wheat this year relative to past years could be another factor in lower Soviet demand.

The Eastern European wheat import forecast was lowered 200,000 tons this month, to 3.3 million tons as crop prospects in Poland improved. In recent years, larger crops and insufficient foreign currency supplies have reduced imports 20 percent compared to the early 1980's.

MAJOR EXPORTING COUNTRIES

The slump in Soviet demand reduces a major outlet for wheat exports which will likely impact all exporters either directly through smaller Soviet sales or indirectly by intensifying competition in the remaining markets.

The 1986/87 Canadian wheat export forecast was cut 500,000 tons to 18.0 million tons because of lower Soviet demand. Reported quality problems are not expected to limit high quality wheat exports, but may result in aggressive pricing of the unusually large volume of lower quality wheat.

EC export prospects fell to 14.5 million tons this month, down 500,000 tons because of increased competition resulting from the cut in Soviet demand. The 1986/87 export forecast is the lowest in 6 years.

The Australian 1986 crop estimate is 1 million tons higher this month, but world competition is expected to limit 1986/87 exports to 14.5 million tons.

Export prospects for the United States dropped to 28 million tons this month, down 1.5 million tons and the second lowest level in nearly 10 years. As a residual supplier, the United States may lose sales in non-Soviet markets as other exporters intensify their efforts following some loss of Soviet sales.

COARSE GRAIN SITUATION

The outlook for 1986/87 world coarse grain trade fell this month as lower import demand in the Soviet Union, Venezuela, and the EC was only partially offset by rising demand in Brazil. In the Soviet Union and Venezuela better crop prospects contributed to the lower import demand. While in the feed grain market, an abundance of EC and Canadian wheat for feed adds to already declining coarse grain demand and prices. On a more positive note, Brazil and China continue to expand corn imports in apparent response to lower prices.

MAJOR IMPORTING COUNTRIES

This month, the 1986/87 import forecast for the Soviet Union was dropped 4 million tons to 12 million to reflect improved crop prospects. The larger harvest will offset the significant decline in USSR imports so that overall availabilities continue at the relatively high levels of recent years. Further adding to grain for feed supplies and possibly contributing to the slow pace of coarse grain imports may be recent Soviet feed wheat purchases which already exceed 1 million tons.

Coarse grain import prospects in Venezuela are now forecast at 500,000 tons, down 1 million tons from last month's forecast. A larger corn crop may increasingly be substituted for imported sorghum and the government continues to ban corn imports.

The 1986/87 coarse grain import forecast for the European Community was lowered 400,000 tons this month, to 4.6 million tons. The EC corn import forecast was cut because Spain and Portugal are quickly adapting to the Community system which encourages the substitution of levy-free EC grains and non-grain feed ingredients for imported corn which is subject to a levy.

Brazil recently purchased more than 500,000 tons of U.S. corn and is reportedly planning to tender for large, additional volumes. To reflect this rapid import pace, the Brazilian forecast doubled to 2 million tons.

MAJOR EXPORTING COUNTRIES

Lower Soviet demand for barley imports is expected to reduce EC coarse grain exports. The forecast was lowered 500,000 tons from last month's forecast, to 6.3 million tons. The Community may compensate for this by increasing barley exports to Spain where the crop has been weather-damaged and barley is being substituted for imported corn.

The sharp reductions in Soviet, EC, and Venezuela's coarse grain import prospects are reflected in a 3.5-million-ton drop in the 1986/87 coarse grain export forecast for the United States. At 40.4 million tons, the forecast is about 11 percent higher than the 1985/86 projection, but is still the second lowest forecast since 1975/76.

RICE

The calendar year 1986 world rice trade estimate was essentially unchanged this month at 12.6 million tons, compared to 11.5 million tons for 1985. Imports have begun to slacken during the final months of 1986.

The only notable change for exporting countries this month was an increase in the U.S. calendar year export estimate from 2.2 million tons to 2.3 million tons. U.S. exports through September totaled about 1.8 million tons. The U.S. forecast for calendar year 1987 remains unchanged at 2.6 million tons.

Rice exports for the major world exporters for the first three quarters of calendar year 1986 are up significantly from 1985 levels, supporting the current 1986 estimates. Large purchases by Brazil are mainly responsible for the increases. Pakistani and Burmese exports are both up by 86 percent, while United States and Thai shipments are up 14 and 11 percent, respectively.

The only significant change for importing countries for calendar year 1986 was a decrease in the Malaysian import estimate from 450,000 to 400,000 tons, in light of recent lower trade reports.

The world production forecast for crop year 1986/87 was decreased slightly this month to about 476 million tons due to production decreases in Bangladesh and a number of small producer countries. However, the Brazilian forecast for the crop to be harvested next spring was increased about 350,000 tons (milled basis) due largely to increases in planted area.

FOOTNOTES TO WORLD GRAIN SUMMARY AND TRADE TABLES

- 1) Includes wheat flour and products.
- 2) Argentina, Australia, Canada, South Africa, and Thailand.
- 3) Adjusted for transshipment through Canadian ports: excludes products other than flour.
- 4) Wheat, rye, corn, barley, oats, sorghum, millet, and mixed grains.
- 5) Production data includes all harvests occurring within the July-June year indicated, except that small grain crops from the early harvesting Northern Hemisphere areas are "moved forward" i.e., the May 1984 harvests in areas such as India, North Africa, and southern United States are actually included in "1984/85" accounting period which begins July 1, 1984, for wheat or October 1, 1984, for coarse grains.
- 6) "Bunker weight" basis; not discounted for excess moisture and foreign material.
- 7) Utilization data are based on an aggregate of differing local marketing years. For countries for which stocks data are not available (excluding the USSR) utilization estimates represent "apparent" utilization; i.e., they are inclusive of annual stock level adjustments.
- 8) Stocks data are based on aggregate of differing local marketing years and should not be construed as representing world stock level at a fixed point in time. Stocks data are not available for all countries and exclude those such as the People's Republic of China, and parts of Eastern Europe. The world stocks level has been adjusted for estimated year-to-year changes in the USSR grain stocks, but do not purport to include the entire absolute level of USSR stocks.
- 9) Inclusive of Soviet stock changes; see footnote 8.

HOW TO SUBSCRIBE

World Grain Situation and Outlook circulars are issued 16 times a year. They are available on a subscription basis for \$28.00 in the United States or \$41.00 mailed to foreign addresses.

To subscribe, send your check, payable to the Foreign Agricultural Service, to: Foreign Agricultural Service, Information Division, Room 4644-S, U.S. Department of Agriculture, Washington, D.C. 20250. Only checks on U.S. banks, cashier's checks or international money orders will be accepted. NO REFUNDS CAN BE MADE.

HOW TO RENEW

You will receive a notification about 60 days before your annual subscription expires. To prevent a lapse in service, promptly return your renewal form and payment. **Inquiries:** If you have a question about your subscription, write to the above address or call (202) 382-9445.

World Grain Situation and Outlook

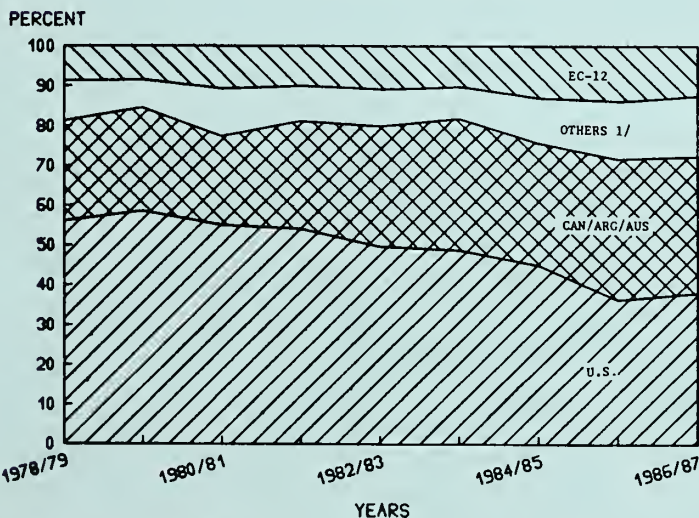

WORLD WHEAT AND COARSE GRAIN TRADE
Million Metric Tons
International Trade Years 1/

1/ JULY/JUNE FOR WHEAT, OCT/SEPT FOR COARSE GRAINS.

This month's cover shows that current estimates now place 1986/87 world wheat and coarse grain trade at its lowest level since the 1978/79 marketing year. This current estimate is down by a total of about 14 million tons from 2 months ago; and at the same time the import estimate for the USSR is down by 11 million tons. Growth in world markets that might be attributed to world prices has not been enough to offset the decline in Soviet imports.

MARKET SHARE OF WORLD WHEAT AND COARSE GRAIN TRADE

1/ CHINA, THAILAND, AND SOUTH AFRICA.

Despite this somewhat dismal world trade picture, the U.S. is experiencing a slight gain over 1985/86 in market share for both wheat and coarse grains, thereby recapturing some portion of markets lost in the early 1980's.

WORLD GRAIN SITUATION/OUTLOOK

For the first time this year, 1986/87 world grain trade is estimated to be lower than last year, as global import demand continues to fall despite low prices. Abundant harvests throughout the world and a sharp build-up in stocks by key exporters, particularly the United States, means importing countries can defer grain purchases without fear of short supplies and higher prices. Further, developing countries that had been rapidly growing grain markets, have not been as responsive to lower world prices as expected. Grain consumption in some of these countries has now reached relatively high levels and growth appears likely to be less rapid in the future. Further, many less-developed countries have been especially hard-hit by low world prices for their raw commodity exports that might otherwise have earned more foreign exchange to finance grain purchases.

With slackening import demand, major suppliers have further reduced prices, leading to intensified competition. The narrowing price differentials between grains is in turn causing shifts between coarse grains and feed wheat in key importing markets.

- 1986/87 U.S. grain exports are forecast at the lowest levels in over 10 years.
- USSR grain imports are forecast down 5 million tons from previous estimates.
- Korea is expected to increase feed wheat imports while reducing coarse grain imports for 1986/87.
- The European Community (EC), notably Spain, is forecast to import more non-grain feed ingredients (NGFI's) at the expense of coarse grain imports.
- Taiwan has signed an agreement to import 600,000 tons of South African corn per year for 3 years.
- Mexico is increasing use of cheaper feed wheat imports, depressing sorghum imports.
- Argentina is expected to have lower production and exports of wheat, corn, and sorghum for 1986/87.
- Barley import demand for Rumania has been reduced by 500,000 tons, due to larger crops.

WHEAT SITUATION

This month's 1986/87 world wheat trade is, for the first time this season, forecast below last year's very depressed levels, reflecting the effects of the current downward trend in world demand situation and a depressed global economy, combined with generally good production levels. The decline in world

import demand, notably by the Soviet Union continues to put pressure on major exporters vying for their share in the remaining wheat markets. Low prices have, however, strengthened feed wheat demand by many importers, including Korea and Mexico.

MAJOR IMPORTING COUNTRIES

The 1986/87 Soviet Union wheat import forecast was reduced by 2 million tons from last month's forecast as a result of the higher crop forecast and sluggish buying activity up to this point in the current marketing year.

An import ban to take effect January 1, 1987, is expected to limit Nigerian wheat imports to one million tons, slightly more than the amount currently committed, down 300,000 tons from last month's projection.

Korea is expected to import 800,000 tons more wheat than previously projected; this increase will comprise greater imports of low-cost, feed-quality wheat.

A reduction of 500,000 tons for projected 1986/87 imports by China reflects large domestic crop prospects and limited buying activity.

MAJOR EXPORTING COUNTRIES

Since the USSR has accounted for roughly 20 percent of world wheat trade in recent years, the drop in the Soviet import projection will have a direct impact on the export levels of the major world wheat suppliers. A sharp reduction in global import demand will likely translate into more intense competition among traditional suppliers, namely the EC, Argentina, Australia, Canada, and the United States.

Argentine wheat exports for 1986/87 are expected to drop 100,000 tons from the estimated level last month as a result of reduced crop prospects.

The EC has issued 20 percent fewer wheat and flour export licenses through November, compared to a year ago, which may reflect the high subsidy costs incurred by EC exports in a surplus world market with low prices and slack import demand.

Estimated Australian wheat exports have been reduced by 500,000 tons due to depressed import demand.

COARSE GRAIN SITUATION

This month's 1986/87 world coarse grain trade forecast of 79.5 million tons, is roughly 5 million tons down from last month's projection, creating the lowest level in over 10 years. Import demand continues to fall with higher grain production in the USSR, increased use of non-grain feed ingredients (NGFI's) in Spain, and substitution of coarse grains in the USSR, Mexico, and Korea by competitively-priced feed-quality wheat from Australia, the EC, and Canada.

MAJOR IMPORTING COUNTRIES

As the domestic supplies in the Soviet Union are forecast to rise, 1986/87 coarse grain imports are expected to fall to 9 million tons, down 3 million tons from earlier estimates. The prospect of sizable crops, combined with the general lack of buying in world markets, points to USSR reductions in coarse grain import demand to the lowest level since 1976/77.

In East Europe, Romanian import demand is projected to taper off 500,000 tons from the previous month's level of 4.7 million tons, with higher crop estimates.

With accession, increased imports of NGFI's, particularly manioc and corn gluten feed in Spain, are figured to displace some imported corn. Recent EC loosening of import restrictions on Chinese manioc and tubers could contribute to increased use in the EC, which in turn would make more domestic grains available for export.

The forecast of Korea's 1986/87 coarse grain imports has been lowered by 500,000 tons as more competitively-priced feed wheat continues to displace traditional feed grains like corn and sorghum.

Australian and Canadian feed quality wheat is moving into Mexico, causing a 200,000-ton reduction in estimated import forecasts for coarse grains, chiefly sorghum.

Japanese imports are expected to stagnate at last year's levels amidst little evidence of livestock feed expansion. Initially, Japan's coarse grain import demand was expected to rise in response to lower world prices. However, the Japanese Food Agency has not passed on to end users the full benefits of lower global grain prices or the weak U.S. dollar vis-a-vis the strong yen.

MAJOR EXPORTING COUNTRIES

For the United States, the shrinking Soviet, EC, Mexican, and Japanese coarse grain import prospects set the stage for this month's 5-million-ton slide from the previous 1986/87 coarse grain export forecast. The current estimate of 35.3 million tons is about 1 million tons below the 1985/86 level, making this year's forecast the lowest since 1975/76.

Reductions in Argentine production are expected to translate into declines of 700,000 tons in 1986/87 exports of sorghum and corn.

Kenya and Zimbabwe are expected to have increased exportable supplies of corn, although high domestic support prices and low world prices could limit trade to barter arrangements with neighboring African countries.

RICE SITUATION

The calendar year 1987 rice trade forecast has been decreased in response to expected reduced import demand in Africa, Asia, and Western Europe. World rice trade in CY 1987 is now expected to reach only 11.7 million tons, down about 300,000 tons from last month's forecast. In comparison, the CY 1986 world trade estimate is 12.6 million tons.

Major Exporters

The export forecast for Thailand in CY 1987 was decreased slightly to 3.9 million tons, reflecting the decrease in expected demand. The estimate for CY 1986 was decreased to 4.3 million tons, reflecting the slower export volumes from that country in the past month.

Large exports by Uruguay to Brazil have prompted an increase in the export estimate for that country in CY 1986, to 280,000 tons.

Major Importers

The slow pace of imports by Malaysia in CY 1986 caused a decrease in the estimate to 325,000 tons for 1986. Imports are expected to recover to 450,000 tons in 1987 to maintain adequate stock levels. These estimates include rice imported outside of the government import agency.

The import forecast for Vietnam was increased for CY 1987, reflecting both the outlook for another poor crop and the ability to obtain financing for imports from the USSR.

The import estimates for Nigeria are now up to 200,000 tons for CY 1986 and 250,000 tons for 1987, reflecting trade reports of substantial smuggling of rice.

The 1986 import estimates for the Ivory Coast were increased to 375,000 tons, due to the poor rice harvest this year. The import forecast for 1987 was decreased slightly to 250,000 tons as production conditions are expected to improve.

U.S. Trade Prospects

The export estimate for marketing year 1986/87 remained unchanged this month at about 2.6 million tons, while CY 1987 exports are now expected to reach only 2.5 million tons. This change reflects expected slow sales in the early part of the new calendar year.

NOTE: YEARS IN PARENTHESES DENOTE PRODUCTION YEARS USED FOR AGGREGATING WORLD CROPS. SPLIT YEARS (E.G. 1982/83) ARE MARKETING YEARS.

1/ PRELIMINARY.
2/ PROJECTED.

SOURCES: PREPARED OR ESTIMATED ON BASIS OF OFFICIAL STATISTICS OF FOREIGN GOVERNMENTS, OTHER FOREIGN SOURCE MATERIALS, REPORTS OF U.S. AGRICULTURAL ATTACHES AND FOREIGN SERVICE OFFICERS, RESULTS OF OFFICE RESEARCH, AND RELATED INFORMATION.

NOTE: "STOCKS AS PERCENT OF UTILIZATION" REPRESENT THE RATIO OF MARKETING YEAR ENDING STOCKS TO TOTAL UTILIZATION.

- 1/ TRADE DATA AS EXPRESSED IN THIS TABLE EXCLUDE INTRA-EC TRADE. WHEAT AND COARSE GRAINS ARE ON A JULY/JUNE TRADE YEAR THROUGH 1975/76. FROM 1976/77 ON, THE TRADE YEAR FOR COARSE GRAINS IS OCTOBER/SEPTEMBER.
- 2/ FOR COUNTRIES FOR WHICH STOCKS DATA ARE NOT AVAILABLE (EXCLUDING THE USSR) UTILIZATION ESTIMATES REPRESENT "APPARENT" UTILIZATION, I.E. INCLUDE ANNUAL STOCK LEVEL ADJUSTMENTS.
- 3/ STOCKS DATA ARE BASED ON AN AGGREGATE OF DIFFERING LOCAL MARKETING YEARS AND SHOULD NOT BE CONSTRUED AS REPRESENTING WORLD STOCK LEVELS AT A FIXED POINT IN TIME. STOCKS DATA ARE NOT AVAILABLE FOR ALL COUNTRIES AND EXCLUDE THOSE SUCH AS THE PEOPLE'S REPUBLIC OF CHINA AND PARTS OF EASTERN EUROPE. WORLD STOCK LEVELS HAVE BEEN ADJUSTED FOR ESTIMATED YEAR-TO-YEAR CHANGES IN USSR GRAIN STOCKS, BUT DO NOT PURPORT TO INCLUDE THE ABSOLUTE LEVEL OF USSR GRAIN STOCKS.
- 4/ PRELIMINARY.
- 5/ PROJECTION.

NOTE: "STOCKS AS PERCENT OF UTILIZATION" REPRESENT THE RATION OF MARKETING YEAR ENDING STOCKS TO TOTAL UTILIZATION.

- 1/ TRADE DATA AS EXPRESSED IN THIS TABLE EXCLUDE INTRA-EC TRADE. WHEAT AND COARSE GRAINS ARE ON A JULY/JUNE TRADE YEAR THROUGH 1975/76. FROM 1976/77 ON, THE TRADE YEAR FOR COARSE GRAINS IS OCTOBER/SEPTEMBER.
- 2/ FOR COUNTRIES FOR WHICH STOCKS DATA ARE NOT AVAILABLE (EXCLUDING THE USSR) UTILIZATION ESTIMATES REPRESENT "APPARENT" UTILIZATION, I.E. INCLUDE ANNUAL STOCK LEVEL ADJUSTMENTS.
- 3/ STOCKS DATA ARE BASED ON AN AGGREGATE OF DIFFERING LOCAL MARKETING YEARS AND SHOULD NOT BE CONSTRUED AS REPRESENTING WORLD STOCK LEVELS AT A FIXED POINT IN TIME. STOCKS DATA ARE NOT AVAILABLE FOR ALL COUNTRIES AND EXCLUDE THOSE SUCH AS THE PEOPLE'S REPUBLIC OF CHINA AND PARTS OF EASTERN EUROPE. WORLD STOCK LEVELS HAVE BEEN ADJUSTED FOR ESTIMATED YEAR-TO-YEAR CHANGES IN USSR GRAIN STOCKS, BUT DO NOT PURPORT TO INCLUDE THE ABSOLUTE LEVEL OF USSR GRAIN STOCKS.
- 4/ PRELIMINARY.
- 5/ PROJECTION.

****FOOTNOTES TO WORLD GRAIN SUMMARY AND TRADE TABLES****

- 1) Includes wheat flour and products.
- 2) Argentina, Australia, Canada, South Africa, and Thailand.
- 3) Adjusted for transshipment through Canadian ports; excludes products other than flour.
- 4) Wheat, rye, corn, barley, oats, sorghum, millet, and mixed grains.
- 5) Production data includes all harvests occurring within the July-June year indicated, except that small grain crops from the early harvesting Northern Hemisphere areas are "moved forward" i.e., the May 1984 harvests in areas such as India, North Africa, and southern United States are actually included in 1984/85 accounting period which begins July 1, 1984 for wheat or October 1, 1984 for coarse grains.
- 6) "Bunker weight" basis; not discounted for excess moisture and foreign material.
- 7) Utilization data are based on an aggregate of differing local marketing years. For countries for which stocks data are not available (excluding the USSR) utilization estimates represent "apparent utilization"; i.e., they are inclusive of annual stock level adjustments.
- 8) Stocks data are based on aggregate of differing local marketing years and should not be construed as representing world stock level at a fixed point in time. Stocks data are not available for all countries and exclude those such as the People's Republic of China and parts of Eastern Europe. The world stocks level has been adjusted for estimated year-to-year changes in the USSR grain stocks, but do not purport to include the entire absolute level of USSR stocks.
- 9) Inclusive of Soviet stock changes; see footnote 8.

This circular was prepared by the Grain and Feed Division, Commodity Programs, FAS/USDA, Washington, D.C. 20250 Further information may be obtained by writing the division or telephoning (202) 447-2009.

Note: The previous report in the series was World Grain Situation/Outlook, Foreign Agriculture Circular FG-13-86 November 1986. For further details on the world grain production and USSR outlook, see World Crop Production, Foreign Agriculture Circular WPC-12-86 December 1986, and USSR Grain Situation and Outlook, Foreign Agriculture Circular SG-12-86 December 1986.

Do you need information about

- Overseas markets and buying trends?
- New competitors and products?
- Trade policy developments?
- Overseas promotional activities?

Then **Foreign Agriculture** — USDA's fact-filled monthly agricultural trade magazine — is for you. Based on official USDA data available nowhere else, **Foreign Agriculture** articles are clear and crisp, written to provide the export information you need, in a concise and extremely readable form.

Special information is found in **Foreign Agriculture's** telegraphed, targeted news departments: Fact File, Country Briefs, Trade Updates and Marketing News. And its tables and graphs will give you an immediate grasp of what's going on overseas.

In addition, periodic special issues—such as the one devoted entirely to value-added exports—will give you a wide range of detailed information about overseas markets.

If you use agricultural facts and figures in your business, you need **Foreign Agriculture**.

Subscribe today! Just \$11.00 (\$13.75 for foreign delivery) brings you Foreign Agriculture for 12 full months.

FAS Circulars: Market Information For Agricultural Exporters

As an agricultural exporter, you need timely, reliable information on changing consumer preferences, needs of foreign buyers, and the supply and demand situation in countries around the world.

The Foreign Agricultural Service can provide that information in its commodity circulars.

World agricultural information and updates on special FAS export services for the food and agricultural trade all are available in these periodic circulars.

For a sample copy of these reports—which can supply you with the information you need to make sound business decisions—check the box indicated, fill out the address form and mail it today.

To subscribe: Indicate which publications you want. Send a check for the total amount payable to the Foreign Agricultural Service. Only checks on U.S. banks, cashier's checks, or international money orders will be accepted. NO REFUNDS CAN BE MADE. Mail this form to: Foreign Agricultural Service

HOW TO SUBSCRIBE

World Grain Situation and Outlook circulars are issued 16 times a year. They are available on a subscription basis for \$28.00 in the United States or \$41.00 mailed to foreign addresses.

To subscribe, send your check, payable to the Foreign Agricultural Service, to: Foreign Agricultural Service, Information Division, Room 4644-S, U.S. Department of Agriculture, Washington, D.C. 20250. Only checks on U.S. banks, cashier's checks or international money orders will be accepted. NO REFUNDS CAN BE MADE.

HOW TO RENEW

You will receive a notification about 60 days before your annual subscription expires. To prevent a lapse in service, promptly return your renewal form and payment. **Inquiries:** If you have a question about your subscription, write to the above address or call (202) 382-9445.

World Wheat Flour Trade Reference Tables and Graphs (1973/74 - 1985/86)

The cover chart shows the development of the world wheat flour trade with respect to the market share by major suppliers. The European Community has long been the front runner in exporting flour and has seen varying degrees of competition from the United States, Canada, and Australia. The United States has been able to maintain a relatively consistent level of flour exports, while Canadian and Australian flour exports have dwindled.

 MAJOR WHEAT FLOUR EXPORTERS: COMMERCIAL, CREDIT, AND AID TABLE AND GRAPHS	38 - 39

Key Points

Several factors influence world flour trade, such as the availability of substitutes, increased domestic production, increased subsidization, and dramatic shifts in weather conditions. Shifts in trade patterns in major flour markets shown by major flour suppliers and importers can be explained by the relationship among these factors.

The most important development in wheat trade since 1973/74 has been Africa's emergence as the destination for about 88 percent of shipments, up from 33 percent a decade and a half ago. Leading destinations include Egypt, Libya, and Sudan, while the United States and the European Community (EC) are the two main suppliers to the continent.

Several important markets have shown major shifts in import patterns over the past years.

- Sri Lanka, once an importer of over 400,000 tons, is now able to meet domestic flour needs as a result of the recently developed internal milling industry.

- Saudi Arabia is also curbing flour imports, although the majority of the flour that is imported comes from the United States whereas it had been a mixed market.

- Egypt, a major credit market, continues to follow a trend of increased flour imports, mainly from the EC and the United States, with the EC now taking the major share of the market.

- The Soviet Union, a major wheat grain importer, has been a sporadic buyer of wheat flour, mainly from Canada on mixed terms of cash and credit.

Introduction

These wheat flour trade data and graphics were compiled to provide a reference of major exporters' flour trade by destination and of major importers' flour trade by origin. The tables and charts are all based on data released by the International Wheat Council (IWC), London, U.K. All yearly data are in July/June marketing years and are reported in thousands of metric tons (1,000 MT), unless otherwise noted.

The major exporting countries, the EC, United States, Canada, and Australia, export over 90 percent of the total world wheat flour. Australia's important role in the world wheat grain trade is not reflected in its contribution to the world wheat flour trade. Traditional flour exporters like Argentina have basically abandoned the flour market, while minor exporters are too numerous to mention, constituting less than 10 percent of world trade.

Explanatory Notes

Quantities below 45 metric tons will appear as 0.0 in the table due to rounding of numbers. Not all values appear on every graph; certain data were omitted if it was determined that they did not add to the value of the graph, i.e., if the values were too small to be observed.

The "Others" category listed for each exporter includes undesignated and unknown destinations. In some instances, the "Others" category is used for countries that were formed or dissolved during the time period of the matrix, e.g. "Arab Gulf Ports", as used by IWC, would be listed under "Others".

The graphs do not necessarily show all sources or destinations that are listed in the data tables; at least 75 percent of origins and destinations are represented. The total world trade data excludes EC wheat flour intratrade.

All data are as reported by the IWC and may differ from data from other sources. This release updates similar, previous issues and is believed to be a concise and accurate description of the world flour trade.

**** DEFINITION OF COUNTRY GROUPINGS ****

European Economic Community - Belgium, Denmark, France, Germany (West), Greece, Ireland, Italy, Luxembourg, Netherlands, United Kingdom.

Western Europe - Austria, Finland, European Economic Community, Iceland, Malta, Norway, Portugal, Spain, Sweden, Switzerland.

HOW TO SUBSCRIBE

World Grain Situation and Outlook circulars are issued 16 times a year. They are available on a subscription basis for \$28.00 in the United States or \$41.00 mailed to foreign addresses.

To subscribe, send your check, payable to the Foreign Agricultural Service, to: Foreign Agricultural Service, Information Division, Room 4644-S, U.S. Department of Agriculture, Washington, D.C. 20250. Only checks on U.S. banks, cashier's checks or international money orders will be accepted. NO REFUNDS CAN BE MADE.

HOW TO RENEW

You will receive a notification about 60 days before your annual subscription expires. To prevent a lapse in service, promptly return your renewal form and payment. **Inquiries:** If you have a question about your subscription, write to the above address or call (202) 382-9445.

U.S. PULSE EXPORTS REFERENCE TABLES AND GRAPHS

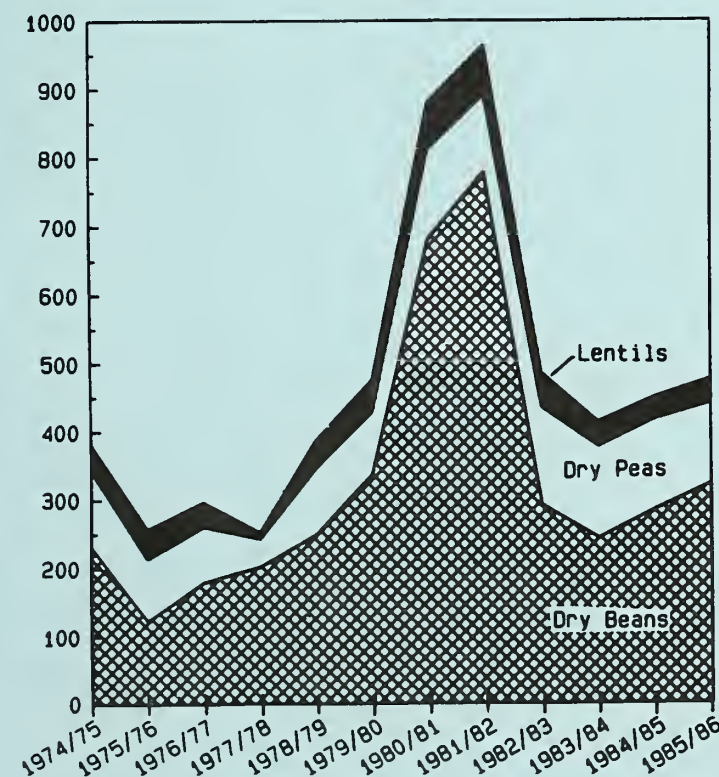

This publication contains U.S. pulse export data by destination covering marketing years (September/August) 1975/76 through 1985/86.

The graph below shows the relative proportion of each pulse type exported. Dry beans account for about 60 percent of the total in recent years, mainly composed of pintos, navies, and great northern beans. During marketing years 1980/81 and 1981/82, U.S. bean exports increased dramatically due to unprecedented Mexican imports, a result of a serious crop shortfall. Peas represent approximately 30 percent of pulses exported in the past 4 years; these are primarily green peas. In recent years, India, Colombia, and Venezuela have become the most important customers for U.S. green peas. Lentils comprise about 10 percent of total pulse exports.

Introduction

The data presented in this publication have been collected entirely from the United States Bureau of the Census. They are based on customs reports. The circular was prepared by the Grain and Feed Division, Commodity Programs, FAS, USDA. In this circular, "pulses" refers to the edible seeds of legumes, and includes dry beans, dry peas, and lentils. U.S. pulse export highlights over the past 11 years include:

--Generally, both volume and value of pulse exports have increased slightly since marketing year (MY) 1982/83, in contrast to the overall decline in U.S. agricultural exports. U.S. pulse exports in recent years were valued at about \$190 million per year.

--Mexico has had the most significant impact on U.S. dry bean exports, particularly pinto and black beans. Large fluctuations in U.S. export volumes have resulted from Mexican crop shortages.

--Colombia, Venezuela, and India have emerged as significant buyers of U.S. peas since MY 1975/76. These countries have represented between 20 and 50 percent of yearly U.S. pea exports over the past 4 years.

--Colombia, Venezuela, Algeria, and the European Community (EC) are key customers for U.S. lentils, accounting for about 50 to 75 percent of annual U.S. lentil exports since MY 1982/83.

--Historically, U.S. pulse export availabilities have been generally stable. However, in MY 1977/78, dry pea and lentil exports dropped considerably due to crop problems.

--Except for MY 1980/81 and 1981/82, the share of exports made up by each pulse type has remained relatively constant.

Explanatory Notes

1. Data in tables are in metric tons. The conversion to a hundred-weight basis is: 1 metric ton = 22.04622 cwt.
2. Data in graphs are expressed in 1,000 metric ton units.
3. Totals in tables may not add due to rounding.
4. "NEC" stands for "Not Elsewhere Classified". For example Western Africa, NEC, would refer to destinations in Western Africa not separately listed.

n.a.: not available.

- 1/ This export by destination series first became available in January 1978.
Prior to then, these exports were included in the "Peas, Other" classification.
Therefore, the 1977/78 column only covers January-August 1978 exports, not the entire marketing year.

n.a.: not available

1/ This export by destination series first became available in January 1978.
Prior to then, these exports were included in the "Peas, Other" classification.
Therefore, the 1977/78 column only covers January-August exports, not the
entire marketing year.

FAS Circulars: Market Information For Agricultural Exporters

As an agricultural exporter, you need timely, reliable information on changing consumer preferences, needs of foreign buyers, and the supply and demand situation in countries around the world.

The Foreign Agricultural Service can provide that information in its commodity circulars.

World agricultural information and updates on special FAS export services for the food and agricultural trade all are available in these periodic circulars.

For a sample copy of these reports—which can supply you with the information you need to make sound business decisions—check the box indicated, fill out the address form and mail it today.

To subscribe: Indicate which publications you want. Send a check for the total amount payable to the Foreign Agricultural Service. Only checks on U.S. banks, cashier's checks, or international money orders will be accepted. NO REFUNDS CAN BE MADE.

Mail this form to: Foreign Agricultural Service
Information Division

HOW TO SUBSCRIBE

World Grain Situation and Outlook circulars are issued 16 times a year. They are available on a subscription basis for \$28.00 in the United States or \$41.00 mailed to foreign addresses.

To subscribe, send your check, payable to the Foreign Agricultural Service, to: Foreign Agricultural Service, Information Division, Room 4644-S, U.S. Department of Agriculture, Washington, D.C. 20250. Only checks on U.S. banks, cashier's checks or international money orders will be accepted. NO REFUNDS CAN BE MADE.

HOW TO RENEW

You will receive a notification about 60 days before your annual subscription expires. To prevent a lapse in service, promptly return your renewal form and payment. **Inquiries:** If you have a question about your subscription, write to the above address or call (202) 382-9445.
